We Safeguard the Future of Our Business by Selling Dependable Goods.

# SPRING AND SUMMER SALE CATALOG

Gasoline Engines Cream Separators Wire Fencing Harness  
Farm Implements Fanning Mills Thresher's Supplies Hardware

**THE HIGHEST GRADE OF FARM SUPPLIES SOLD DIRECT TO THE FARMER**

In ordering use both this SALE CATALOG and our GENERAL CATALOG. Prices shown here are our latest revised prices on these goods. For other goods not listed here use prices given in GENERAL CATALOG

The Prices quoted in this Catalogue will be found so much lower than the prices generally quoted elsewhere, that the saving effected by buying from us this year will be greater than ever.

We strongly advise you to place your order for your Spring and Summer requirements now, even though you may not need the goods until a later date, as the markets are steadily advancing, and we want you to get your share of these money-saving items.

This Diploma was awarded us for the Highest Number of Points scored in a Gasoline Engine competition open to the world, held at Winnipeg. This Diploma is a proof of the superiority of our merchandise.

Why experiment with untried engines or farm supplies? Buy from Judson and be sure.

We have just the same quality in our Cream Separator, in our Wire Fencing, in our Plows, in our Harness, and in our Hardware---The Best Procurable.

We never make a statement regarding the quality of our goods that we are not prepared to prove, in actual comparison or competition.

**WE HAVE BUILT UP THE LARGEST BUSINESS OF ITS KIND IN CANADA—ON THIS IDEA**

Mail Order Houses have always been conceded to be able to offer lower prices than retail dealers can even approximate. The C. S. JUDSON CO., from the beginning, have built their business on the idea that these mail order prices should be extended to Merchandise of Quality—not cheap, ordinary merchandise, sold at a price, but the best merchandise only—the finest—and yet sold at the low price which selling direct permits. This is what won for us trade immediately. The Diploma proves to you that we have lived up to this idea; it proves to you that the foundation of this business is built on quality.

No other mail order house in Canada has ever attempted to duplicate our Quality or our Price.

When you buy from The C. S. JUDSON CO. you buy from a firm which applies its entire staff and equipment to giving The Farmer Real Service in this one line of business. It stands to reason that such a firm, specializing in Gasoline Engines, Farm Supplies, Harness and Hardware, can study your exact requirements better, buy cheaper, and fill your orders more promptly and with fewer errors than firms spreading their efforts over merchandise generally.

**THERE ARE PRICES QUOTED HERE AT ONE-HALF THEIR REGULAR VALUES**

# THE MOST Satisfactory Small Engine Made

Solve Your Labor Problem—With a "Judson Handy Boy" at the same Old Prices

THE ONLY SMALL ENGINE SOLD WITH 2-PULLEY ATTACHMENTS COMPLETE

## What The Judson Handy Boy Engine Will do

Our 1½-Horse Power Gasoline Engine is high grade in every respect, water cooled, and we guarantee it to be equal to most 2-horse power gasoline engines on the market.

Particularly adapted for running light machines, such as the cream separator, churn, washing machine, grindstone, fanning mill, small feed cutter, for pumping water or running a line shaft with two or three of these machines attached.

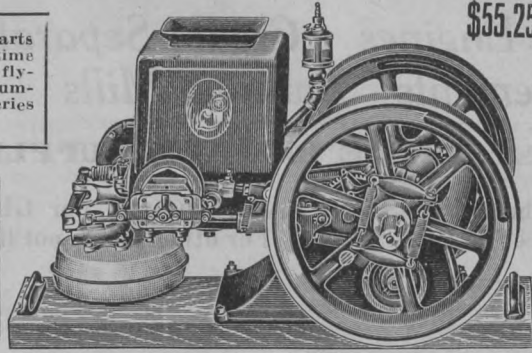

An Engine for the home, shop, factory or farm; simple, durable, economical, easy to start. At prices quoted engines are complete, all ready to run. A book of instructions is sent with each engine, telling how to start and take care of it, and we guarantee you satisfactory service.

No. 2C7—Handy Boy 1½ Horse Power Magneto, equipped with speed reducing gear and pulleys. Weight, 325 lbs. Price

No. 2C8—Handy Boy 1½ Horse Power Battery Ignition, equipped with speed reducing gear and pulleys. Weight, 320 lbs. Price

The magneto starts the engine every time on one turn of the fly-wheel, winter or summer. No batteries needed.

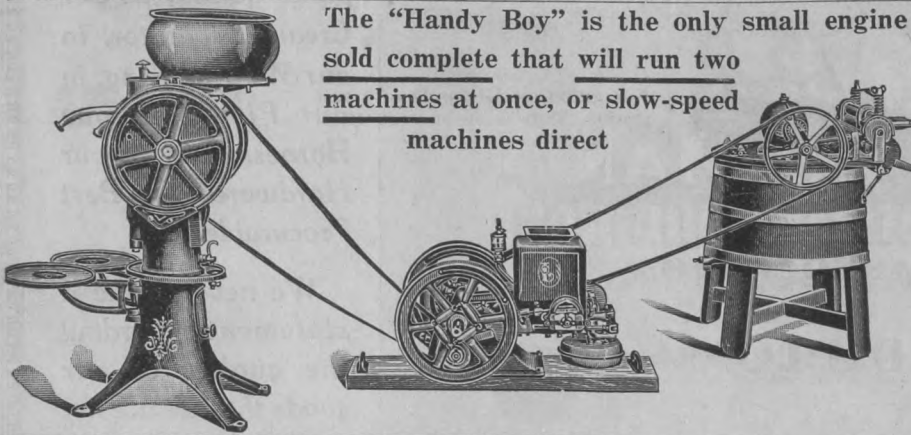

We furnish a speed regulator on this engine, which gives a wide range in speed without stopping the engine.

\$55.25

This little wonder worker is always ready to do all the back-breaking chores. It is so easy just to feed it with a little fuel, turn the wheel and watch it do the heavy part of the work, while you simply do the directing. It will save the cost of a hired man entirely.

The "Handy Boy" is the only small engine sold complete that will run two machines at once, or slow-speed machines direct

## THE FARMER'S FRIEND

\$35.00

# DAVID BRADLEY FARM IMPLEMENTS

The Only Line of High Quality Standard Farm Implements Sold Direct FROM FACTORY TO USER

Over 83 years of successful manufacturing behind the David Bradley Factory. We have eliminated all the profits of middlemen. The farmer now buys these famous farm tools direct, at factory cost, with but one

profit added. Such incomparable quality and values as you will find throughout our line of David Bradley Implements, backed by the absolute protection of our unlimited guarantee, certainly merits your orders.

ALWAYS HIGHEST IN QUALITY—NOW LOWEST IN PRICE

THE BIG DAVID BRADLEY FACTORY—FOUNDED 1832

The Bradley Line is not new to the Canadian Farmer, as there are thousands of farmers in Western Canada who can testify to the sterling qualities of the Bradley Implements. We could sell you a cheaper line of plows and implements made by some factory who are ashamed to put their name on goods of doubtful quality, but this is not our policy;

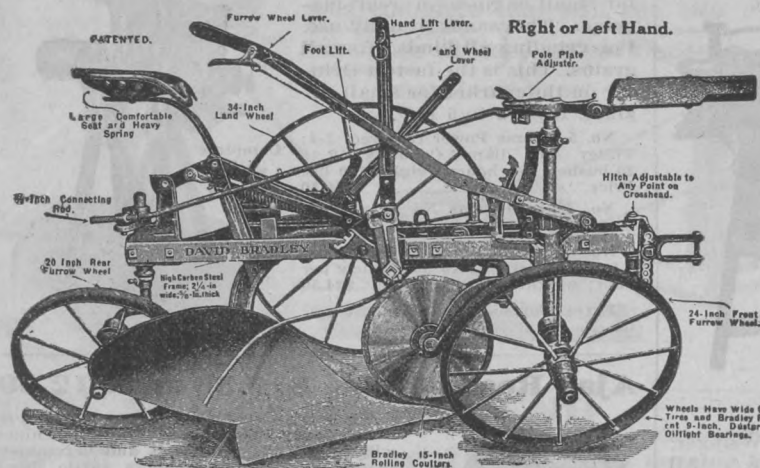

**We must sell goods equal to the best manufactured at money saving prices**

That is why we sell you the Bradley line of Implements on a guarantee of perfect satisfaction or your money refunded. **PROMPT SHIPMENT FROM WINNIPEG**

## COMPLETE DIRECTIONS ARE SENT WITH DAVID BRADLEY IMPLEMENTS

We prepare every shipment in such a manner that setting up is a simple matter for even the most inexperienced. Every part is fitted at the factory, and with the aid of the illustrated directions we furnish, you cannot experience the slightest difficulty either in setting up or operating. We also furnish complete repair lists, which enable you to readily identify every part of the implement, and tell you exactly what to order and how to order any part which might ever be needed.

## Bradley X Ray No. 2 Frame Hitch Sulky Plow \$52<sup>50</sup>

**High Lift Light Draft  
Easy to Handle**

This plow contains every good feature a Riding Plow can possibly have. Frame is wide and made of extra heavy high carbon steel,  $\frac{3}{8}$ -inch thick. Wheels are high, giving a clearance to the frame of 23 inches from the bottom of the plow. Plow is very light draft. By a slight pressure on the foot lever the driver can easily lift plow out of the ground without any trouble.

In any ground this is one of the best plows that can possibly be used. There is absolutely no side motion to the beam, it being held in place by a heavy ball. Levers are conveniently located so as to operate easy from the side.

The plow bottom furnished with these plows is the famous Garden City, Clipper. They successfully meet the various conditions of the soil throughout the West. Prices are for the Plows, complete, with three-horse hitch, pole, neckyoke, 15-inch rolling coulter, weed hook and wrench.

## Bradley No. 6 Gang Plow---THE PLOW WITHOUT SIDE DRAFT

OUR FACTORY TO FARM PRICE ON THE QUALITY PLOW

The No. 6 Gang Plow, for durability, ease of handling, light draft, and capacity for all kinds of work cannot be excelled. It has several features which are covered by patents that are not found on any other plows. Bottoms are connected with the plow frame by two heavy balls. The frame is extra heavy high carbon steel. The heaviest frame used on a double bottom gang plow is as heavy as some makers use on triple bottom plows. Beams are heavy, first quality carbon steel, 2 inches thick, and strongly braced at both front and rear. We guarantee these beams not to twist, bend or break. The Bradley foot lift works so easy, and its leverage is so powerful, that the bottoms can be easily handled by a boy. The No. 6 is a high lift plow, beams lifting  $5\frac{1}{2}$  inches from the ground. Prices are for the plow complete with pole, four-horse eveners, neck yoke, and rolling coulter. A five-horse string hitch furnished for \$2.00 extra.

**Most  
Complete  
Cultivator  
Made**

No. 3C1—With compound lever expander, by means of which width of cultivator can be adjusted from 10 to 26 inches. Teeth can be entirely raised out of ground for transportation from field to field. Equipped with lever wheel, rear depth regulating wheel; the lever wheel enables operator to change cutting depth in a minute. Has five 8-inch right angled blades. Front wheels can be turned in all the way around and set at different angles. This is the most complete cultivator made, thousands are in use, giving perfect satisfaction. Weight, 90 lbs. **Special Sale Price** ..... **\$7.50**

Buy this harrow and you will have as satisfactory and up to date disc harrow as you could purchase at any price; a machine which does perfectly uniform work, relieves your horses of worry and neck weight and makes it possible for you to work clear out to the edge of plowed ground, close to fences, and to turn corners easily. The tongue truck can be easily detached and used on numerous other implements. A forward pole can be used on the truck if desired. This will add no neck weight; merely serves to better control the team. If you wish us to furnish a pole with the harrow, we will do so for \$3.00 extra. Prices are for the disc harrows complete with eveners, scrapers, weight boxes and tongue truck. We furnish a three-horse hitch with harrows having twelve discs, a four-horse hitch with harrows having fourteen or sixteen discs, and a five-horse hitch harrows having twenty discs.

SEASONED HARD WOOD FRAMES

RIVETED AT EACH TOOTH

150-TOOTH HARROW.

The diagram illustrates the mechanical structure of a 150-tooth harrow. It features a series of rectangular frames made of seasoned hard wood, which are connected to a central horizontal bar. Each frame is designed with a grid of teeth, and the entire assembly is riveted at each tooth point. The harrow is shown in a perspective view, highlighting its flexibility and the arrangement of the teeth.

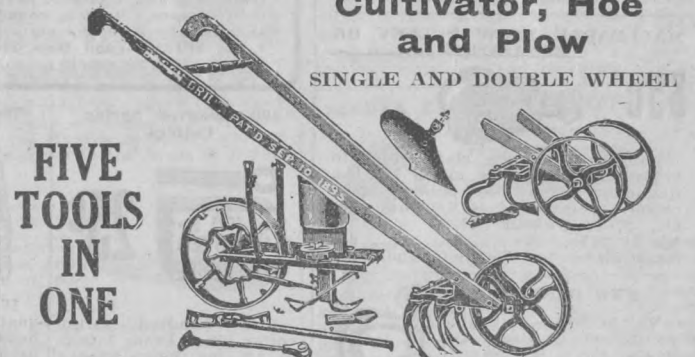

Frames are made of the best quality, seasoned hardwood, strongly riveted at each tooth and firmly braced. All wood parts are well painted with a first quality oil paint, which serves as a great protection against action of the weather and increases the life of the harrow. Others offer harrows made of cheap grades of lumber, painted with low grade mineral paint, and in many other ways inferior. Do not be misled; insist upon getting a harrow of quality equal to the Bradley; one made of the best quality of timber. Teeth are  $\frac{1}{2}$ -inch square. Sections are independently connected to drawbar with drop link clevises, allowing flexibility. The 102-tooth harrow cuts 16 $\frac{1}{2}$  feet, has one center and two side sections, and a three-horse drawbar; the 150-tooth harrow cuts 26 feet, has one centre, two wide and two narrow side sections, and a four-horse drawbar which is fitted with a sheave pulley and roller draft equalizer.

No. 3C305—102-Tooth	Three Section Boss Harrow, weight 245 lbs.	Price...\$16.25
No. 3C306—150-Tooth	Three Section Boss Harrow, weight 350 lbs.	Price... 22.50

**\$10.<sup>00</sup> VICTOR Combined Hill  
and Drill Seeder,  
Cultivator, Hoe  
and Plow**

## SINGLE AND DOUBLE WHEEL

# FIVE TOOLS IN ONE

A STRICTLY HIGH GRADE ARTICLE.

Made of channel steel; a very popular harrow. Teeth are 9-16 in. square, threaded and nutted on top and are removable; are standard length, guaranteed. As good harrow of its kind as you can buy; each section has 20 teeth and cuts about 3 feet wide. Drawbars furnished with all harrows except the one section; the 6 sections has 4-horse drawbar which is fitted with sheave pulley and roller equalizer, same as Wood Boss Harrow.

No. 3C307—	20-Tooth	One Section Steel Harrow,	52 lbs.	Price.....	\$ 3.25

No. 3C311—	120-Tooth	Six Section Steel Harrow,	380 lbs.	Price.....	23.50

An outfit that will please and give excellent satisfaction. The feed, while simple, handles a very large variety of seeds, getting an even distribution which is unequalled and very satisfactory in sowing alfalfa, parsnip, bricky spinach, wrinkled pea, beet, etc., getting an even sow with light seeding. The feed will also handle phosphates, which can be sown before or after seeding.—Has angle steel frame with hill drapper. Agitator and cultivator are of malleable iron, giving lightness with strength. Hill Dropper will deposit seeds in compact hills, 9, 12, 18 or 36 inches apart. Has shoe opener for onion and shallow-sown seeds, and point opener for deep sowing. Both deposit the seed in a narrow line, allowing close cultivation, thus saving hand labor. The handles are adjustable to height of operator. The wheels can be raised or lowered, for deep or shallow cultivation. The cultivator attachments are: 5 teeth, 2 hoes, and right plow.

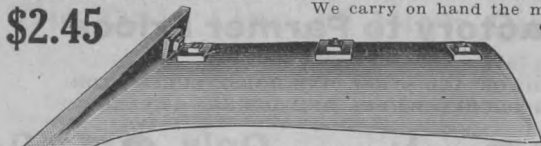

**No. 3C4—Combined Hill and Drill Seeder, Single and Double**

## PLOW BOLTS

### PLOW BOLTS

Best quality, standard in size and shape, with forged nuts. No. 1 is Keyhead Pattern; No. 3, Round Head with square shank, 3/4-inch diameter; length, 1, 1 1/4, 1 1/2 and 2-in.

No. 1 length, 1, 1 1/4, 1 1/2 and 2-in. Price, per dozen .....25c

### MALLEABLE PLOW PULLEY OR EQUALIZER

85c

For chain or rope, state which in ordering. Takes rope up to 1 1/4 ins. diameter. Has 4-in. pulley, 7/8-in. clevis opening, and is 8 inches over all. Weight, about 7 lbs.

No. 5C2317—Price ..... 85c  
 No. 5C2318—Plow Pulley for chain 90c

### END CLEAVES

No. 5C2313—Malleable Iron End Clevises; inside measure, 3/4 inch. Price ..... 7c

### PLOW RINGS

Made of malleable iron, 1/2-inch diameter, 3 inches long, 1 1/4 ins. wide inside. Weight, 3/4 lbs.

No. 5C2315.—Price 7c

### DRILL COVERING CHAINS

To fit grain drills, 3 links as illustrated. No. 3C11—Price ..... 25c

5 CENTS EACH

## STEEL HARROW TEETH 5 CENTS EACH

WILL FIT ALL MAKES OF CHANNEL STEEL HARROWS AND WOOD BOSS HARROWS

IT WILL NOT PAY YOU to repaint your old Harrow Teeth at our price.

No. 3C12—High Carbon Steel Harrow Teeth, as illustrated, will fit all makes of steel harrows. Length of teeth, 6 1/2 and 7 inches, 9/16 inch square, 1/2-inch round shanks. Be sure and state length wanted when ordering. Price, each.....5c

No. 3C121—Wood Boss Harrow Teeth, 8 inches long, pointed; 1/2 inch square. Price, each ..... 5c

100 assorted Spring Cotter's.

25c

One hundred spring cotter pins. From 1 inch to 2 1/2 ins. long. Needed often. Weight, about 2 lbs.

No. 3C10—Price .... 25c

100 Carriage Bolts in Assorted Sizes

17 sizes, strictly first quality goods. Round heads, square shoulders, deep threads, full size nuts.

No. 3C8—Complete assortment of 100 bolts. Price .....\$1.10

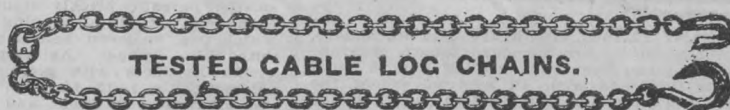

50 Assorted Machine Bolts.

\$1.00

Assortment of 10 lengths and sizes from 2 to 5 inches long by 3/4, 5/16 and 3/8-inch diameter. Wt., about 5 lbs.

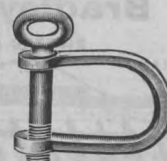

No. 3C7—Price ..... \$1.00

## TESTED CABLE LOG CHAINS.

First quality Chains, fitted with heavy grab hook on one end and swivel in centre. Warranted full size. N better chain made.

No. C5164—5-16x14 ft. Log Chain. Weight, 18 lbs. Price, each .....1.35  
 No. C3814—3/4x14 ft. Log Chain. Weight, 22 lbs. Price, each ..... 1.50  
 No. C3816—3/4x16 ft. Log Chain. Weight, 25 lbs. Price, each ..... 1.65

Here is the Place to Buy Your Wagon and Farm Clevises

### DIAMOND HIGH GRADE SICKLE AND TOOL GRINDERS, WITH BEVEL STONE

One of the most compact, strongest and simplest sickle grinders on the market. Is entirely automatic in its grinding movements, the bevelled stone moving up and down against the sections, grinding them even and true. Does not grind at any one point long enough to heat or draw the temper. Can be adjusted to grind from point to heel or to grind only down to the knife bar. Knife holder works with a lever handle, which makes it possible to easily and quickly change the position of the knife for grinding the next section.

No. 3B45—Diamond SICKLE and Tool Grinder, complete with one bevel knife stone. Shipping weight, about 25 lbs. Price .... **\$3.50**

Elevator, Platform and Adjuster or Butter Conveyor Canvases to fit the leading makes of Binders. They are of standard weight, size and construction. We guarantee them to be made of as good material as the original ones on a new machine, and they will fit perfectly if you will give the correct numbers and size when ordering. End of canvas forms a flap which covers the straps and buckles. Slats are of smooth finished hardwood, riveted and stapled solid to the canvas.

Numbers and sizes listed below correspond with those printed on the canvases received with your new machine. State size and name of binder, number and size of canvas, and whether for upper or lower elevator. If impossible to find numbers and sizes of old canvases, measure width, also the length from buckle to last hole in strap.

# Your Chance to Save Money on a High Grade Wagon—Order Early

## REASONS WHY OUR WAGONS TAKE THE LEAD

We Use the Best Bone Dry Hickory Axles and Spokes

Cottonwood Sides in the Box

Double Bottoms Over Both Bolsters

All Gear Woods Dipped in Boiled Linseed Oil Before Ironing

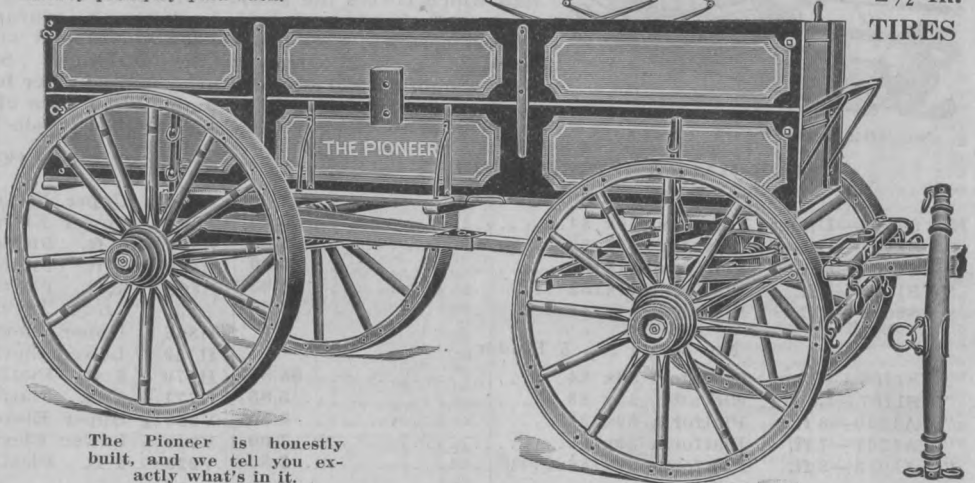

Riveted Rims Full Length Bolster Plates Sand Proof Skeins

We fully realize that the selection of a farm wagon is a big problem with most farmers. It is only natural for you to want the best made and lightest running wagon at the lowest price. After carefully studying the equipment of various wagon factories in order to determine the one best prepared to give the greatest value at the lowest cost, we decided upon the Pioneer Wagon. The factory building these wagons for us is one of the best in this country. It is equipped with all the up-to-date machinery necessary to construct the highest type of wagons at a minimum cost. It employs the most skilled mechanics, men who have been in the industry all their lives. Most of the raw materials used in construction, as well as power, are obtained from the vicinity, again helping to reduce the cost of construction and operation and permitting us to offer the Pioneer at a price that no other factory, less favorably located, could equal.

**Material**—We do not substitute birch hubs, maple axles, such as are to be found in many other wagons. Our axles are made of tough, bone dry hickory, the best that grows. Wheels have tough, oak hubs, hickory spokes and oak rims riveted on both sides of the spokes. Bolsters, hounds and reaches are made of first class oak. All wood gear parts are dipped in boiled linseed oil before being ironed, to close the pores of the wood and prevent the absorption of moisture. The sides of the boxes are made from a seasoned cottonwood, which is lighter and superior in every way to any other material that can be used for this purpose. The bottoms are made of clear, long-leaf yellow pine with four heavy cross sills and four light cross sills. The bottoms are double over both front and rear bolsters, and the extra or false bottoms are securely held in place by rabbeted cross sills riveted clear through the bottom. We use two pairs of outside braces. The sides are further reinforced by an iron plate across the rear end to prevent splitting. Comstock patent rear end gate. Top edges all protected with beveled edge iron. Top boxes have hickory box plates.

**Ironing**—A perfect, light-running wagon depends as much upon the right kind of ironing as upon the wood used. It is necessary that the skeins be set mechanically correct in order to make it light-running. Each axle point is cut to fit its individual skein and the skeins are set as nearly perfect as mechanical skill can make them. The boxes are set absolutely true and forced into place with a powerful hydraulic press. The hub bands are made of sable iron, which is much more expensive than common iron

A one year guarantee certificate with each wagon. We guarantee every part of this wagon against defect in material or workmanship for one year. If anything shows a defect within that time, it will be replaced at our expense. We also guarantee safe delivery and entire satisfaction. If the wagon is found unsatisfactory, it may be returned at our expense, and your money promptly paid back.

The Pioneer is honestly built, and we tell you exactly what's in it.

**\$79<sup>50</sup>**

WITH  
2½-In.  
TIRES

and is positively the best material ever used for this purpose. The tires are set by hydraulic pressure and the wheels are dishd just enough to make the spokes stand perfectly plumb from the ground to the axle. Rims are riveted on both sides of the spokes to prevent splitting. The bolster plates are cup shaped and extra long.

Axles are reinforced with heavy truss rods, skeins are sand proof and the throat of skeins are grooved for the truss rods, thus making our axles much stronger where they enter the skeins, and is a great advantage over the ordinary type of skein generally used.

**Front Gear** is square hound drop tongue, well ironed and braced throughout, axle and sand bolster are bound together with clips and not weakened by bolt hobs—one of the strongest gears possible to make.

**Rear Gear**—Hounds are doubly braced, no bolt holes in the axle. Clips are used instead thereby strengthening the gear. Bolster ends are specially ironed to prevent splitting; bolster stakes are ironed inside and out with side and outer braces.

**Painting**—All gear wood parts are dipped in boiled linseed oil before ironing in order to close the pores of the wood. After ironing they are given two coats of the best grade lead and oil paint, varnished and striped by hand. Color of gear is light red. Box is painted green and striped.

No. 12C343—3½x11-in. Pioneer Wagon; 6,000 lbs. capacity; 28-in. by 11-foot box; 2½x½-inch tires. Weight, 1,250 lbs. Price, **\$79.50**

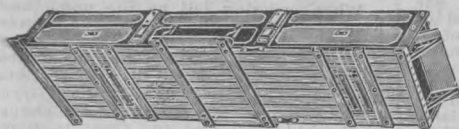

No. 12C344—3½x11-in. Pioneer Wagon; 6,000 lbs. capacity; 28-in. by 11-foot box; 3x½-inch tires. Weight, 1,300 lbs. Price, **\$82.50**

Gear only, without box or seat, but with whiffletrees and neckyoke, Price, **\$62.00**

Gear only, without box or seat, but with whiffletrees and neckyoke, Price, **\$63.50**

No. 12C130—Extra heavy teaming gear only, 3½-in. x 12 in. skein, 5/8x3 inch tire. Weight, 1,100 lbs. Price, with neck yoke and trees **\$72.50**

### BOTTOM VIEW OF OUR WAGON BOX

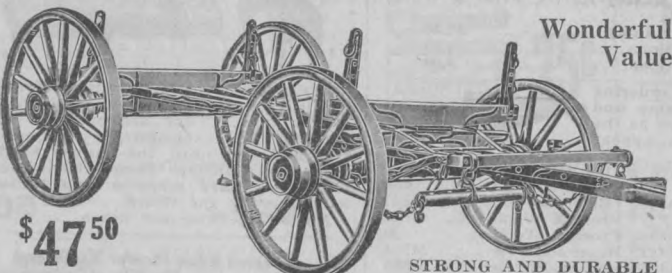

crosspieces on bottom, four hold down rods, four box rods, bolster rub irons, anti-spreader chain. Comstock patent end gate, four hickory cleats, stake chafe irons on side. Top box is fitted with steel grain cleats which project over lower box making it absolutely grain tight. Weight, 425 lbs.

No. 12B340—28-inch Double Wagon Box, without seat, **\$22.55**  
No. 12B341—10-inch Tip Top Box, Extra, **5.00**  
No. 12B342—High Back Seat, Extra, **4.00**

Compare this box with any of the high grade boxes on the market. Notice the following points: Double bottoms over both bolsters, and cleats riveted through sides, iron plates on rear ends, eight

### STANDARD WIDE TIRE FARM TRUCK

**\$47<sup>50</sup>**

Wonderful  
Value

STRONG AND DURABLE

The Axles are of the best hickory, selected stock, fitted with 3/4x10 in. best cast skeins. Bolsters of best oak with 12-inch mortised stakes, with two rings heavily ironed. Width between bolsters 38 in. The front hound is made of 1½-in. angle steel reinforced with wood and heavily braced. It has regular wood hounds in rear. The tongue and reach are made of best seasoned oak, and the tongue is the regular farm wagon style built into the hounds and heavily ironed. Wheels are made of tough white oak. Finish—Painted red, varnished and striped.

### FARMER'S LOW DOWN HANDY WAGON

**\$32<sup>50</sup>**

Grooved  
Tires

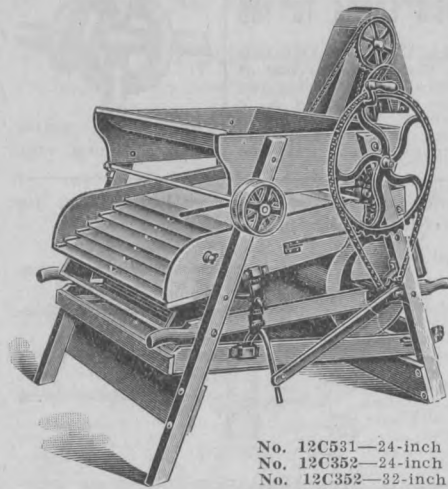

A WAGON OF THIS STYLE IS A NECESSITY ON EVERY FARM

It is built low down so that it can be easily loaded. Has steel wheels which are not affected by climatic conditions. The wide tires do not cut up the fields. The axles are made of hickory and the remainder of the gear of oak. Stakes are mortised into the bolsters and well braced. Has oak front hounds, which are more satisfactory than wagons built without front hounds. The wheels have heavy cast hubs, oval steel spokes, and 4x3/4 in. grooved tires. Capacity, 5,000 lbs. Skeins, 3/4x10-inch. Front wheels 28-in.; rear wheels, 30-inch. Shipping weight, 550 lbs.

No. 12C136—Handy Farm Wagon **\$32.50**

# North Star Grain Grader, Separator and Fanning Mill

Grow bigger and better crops by using cleaned, graded and selected seed. Increased crops from one acre will pay for the mill that will give you such seed. North Star Mills will clean, grade and separate any kind of seed and throw out all dirt, trash and weed seeds, all at one operation. They will handle successfully mixtures, that cannot be handled in many other mills. They operate on scientific principles, and if you order them with proper equipment for your work, they will not fail. Mills are strongly constructed, nicely finished and very easy running. Only first grade kiln dried lumber used. Fans are enclosed in large sheet steel drum and give strong, steady air blast. Blast is controlled by blinds on sides of drum and any desired amount of blast obtained. The fans are of large capacity, and will furnish ample blast for any kind of work. These mills are shipped and all set up and you are saved the bother of putting a complete mill together. Hoppers are of large capacity with a simple feed adjustment. A turn or two of the hopper crank opens or closes the gate of the feed as much or as little as desired, and the grain is distributed evenly over the full width of the sieves, which is necessary for a uniform quality of work.

Made in four sizes, all with double shoe; sieves are 36 inches long in all our mills. The 24-inch mill has a capacity of from 35 to 45 bushels per hour; is 40 inches long, 28 inches wide and 39 inches high. The 32-inch mill has a capacity of from 40 to 50 bushels per hour; is 40 inches long, 36 inches wide and 39 inches high. — Screens are kept from clogging by a scrubbing bar. The 32-inch is an all round farm mill of great capacity; runs as easy as any small mill made. If you have a gasoline engine we furnish a power attachment to run the mill by engine power, for \$2.50 extra.

**Equipment.**—Seven screens and a wheat gang are regular equipment with every North Star Mill. With this equipment the mill will clean and separate most all grains grown in the west. We send a book of instructions, "How to Operate", with every mill. For barley we furnish a barley gang at following prices:

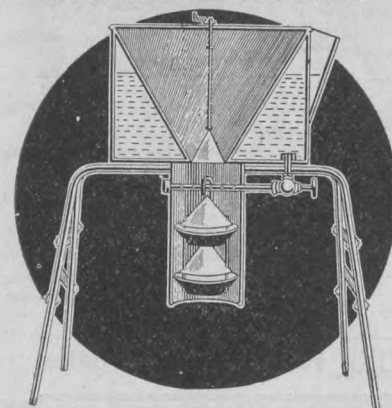

For 24-inch mill ..... \$5.00      For 32-inch mill ..... \$5.50

The sacking elevator is a most convenient attachment, and we recommend you to buy it. It prevents seeds and dirt getting mixed again with the grain. Discharge spout is double and holds two sacks.

No. 12C352—32-inch North Star Fanning Mill. Weight, about 155 lbs. Price		\$3.50
No. 12C353—32-inch North Star Fanning Mill, complete with sacking elevator. Weight, about 195 lbs. Price		\$3.50
No. 12C354—Power Attachment and Pulley to suit either of above mills. Extra		

## AUTOMATIC ONE MAN GRAIN PICKLER

One of the Best Picklers Made

Sectional View of Mixing Cones

This Automatic Spray Smut Killer is a one-man machine and operates entirely without power. There are no cranks to turn—no complicated machinery—no elevators to bother with. You simply pour the grain in at the top and take it away at the bottom. One man or a boy can treat enough grain in one hour to run several drills all day. When seed grain is put through this machine no seed can escape treatment and none can become soaked. It is so constructed that every seed gets the same even coat of formaldehyde. The top of the hopper when mounted is about 4 feet from the floor. Capacity of hopper about 1½ bushels. Capacity of solution tank, about 22 gallons. Both hopper and solution tank are made of heavy galvanized steel. When not in use hopper can be removed and machine folded up to store in small space. Full directions for using sent with each machine. Machine is made entirely of steel. Weight, about 50 lbs.

No. 12C500—Price ..... \$15.00

## Field Stacking Outfit \$22.50

### FIFTY-FOOT CABLE OUTFIT

No. 5C1806—Outfit for 50-foot stack consists of: 150 ft. ½-inch galvanized cable; 2 clamps for making loops around end stakes; 2 shoulder clamps, to prevent posts working inward; 2 bolts, to screw parts together where they cross; 1 double harpoon fork; 3 knot-passing pulleys; 130 ft. ¾-inch manila rope; 50 ft. ¾-inch check rope and \$22.50

1 "Ideal" cable carrier. Price..... For longer outfits than 50 feet, add 15¢ per foot for each additional foot wanted, and extra length of cable and rope will be sent.

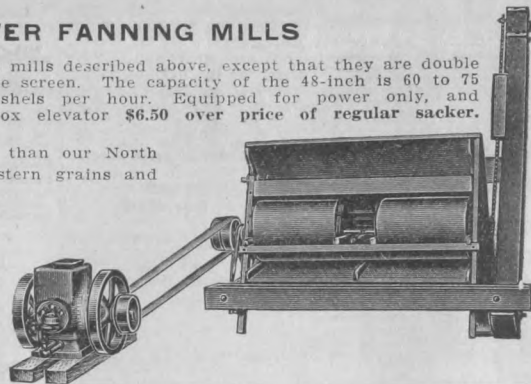

## BIG CAPACITY POWER FANNING MILLS

These mills are built on the exact principle as mills described above, except that they are double widths, being made 48 and 60 inches wide in the screen. The capacity of the 48-inch is 60 to 75 bushels per hour, and the 60 inch is 100 to 120 bushels per hour. Equipped for power only, and supplied complete with regular sacker. Wagon box elevator \$6.50 over price of regular sacker.

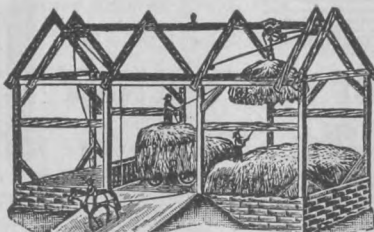

There is no better mill sold in Western Canada than our North Star—manufactured in the West to suit western grains and conditions.

No. 12C355—48-inch North Star Power Mill complete with power attachment and sacking elevator. Weight, about 320 lbs. Price... \$65.00

No. 12C356—60-inch North Star Power Mills, complete with power attachment and sacking elevator. Weight, about 360 lbs. Price..... \$5.00

## COMPLETE HAY CARRIER SLING OUTFITS

Our Hay Cars work from centre as well as end.

Including all Fittings necessary. The Sling car we supply with our Sling Outfit is a better car than agents sell for \$16. We have thousands of these Hay Outfits in use, and guarantee them to be easily erected and give perfect satisfaction. Here are the prices complete.

### FOR CONVENIENCE IN ORDERING

We have arranged these Steel Track Outfits complete for different sized barns, for the accommodation

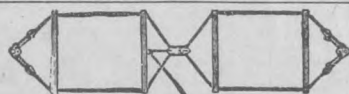

It is a very simple thing to erect a Hay Carrier Outfit, either in the field or barn. If you can drive a nail you can put up either a Steel Track Outfit or a Cable Outfit.

of our customers, not only to save them time and trouble, but also for those who do not know just what an outfit consists of. We have arranged them, however, in the best possible manner, that is, saving you as much as we possibly can, at the same time giving you plenty of everything necessary. Larger rope than one inch cannot be used. — The brackets and the hanger hooks are furnished to be placed on every rafter where 2 feet apart, as is used in modern barns. — The steel track is made of 1-inch angle steel, 2 pieces held together with malleable clamps. Is cut in 10-foot lengths, with two 5-foot pieces to each outfit to break joints. — We use best grade special Manila Rope, ¾-inch, although carriers will use any size from ¾ to 1-inch.

## Highest Quality Lowest Prices

That is why we sell more fencing direct to the user than any other concern in Western Canada.

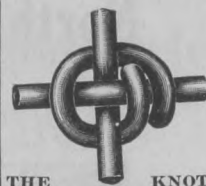

Put up in rolls of 10, 20 and 40 rods.

# EMPIRE BIG WIRE FENCING

AT MONEY SAVING PRICES  
DIRECT FROM LOOMS TO YOU

We use only the very best hard galvanized steel wire, guaranteed to be full gauge, and as rustproof as it is possible to make it. Our workmanship is the best.—Fencing buyers can realize a handsome saving on their season's requirements by placing their orders during this sale. Even though the fencing be not needed until later on, it will pay you well to order now.

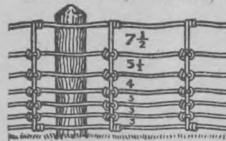

PROMPT SHIPMENT on a BALE or a CARLOAD  
You will find EMPIRE Wire Fencing to be one of the stiffest, strongest and most rustproof fencing you have ever used. We guarantee every rod of it to stretch up perfectly and give absolute satisfaction in all respects, otherwise it may be returned at our expense and we will return all money paid for it and freight charges.

THE KNOT  
That Cannot Slip

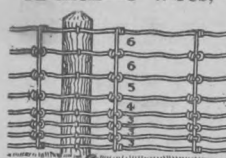

Your order filled with bright new fencing fresh from the looms, instead of from a stock which has lain weather-beaten for months—that is why EMPIRE Fence is worth 2 to 3 cents a rod more than most fences.

# EVERY FARMER HIS OWN PUMP MAN

## Instal Your Own Pump, It Is Easy

THESE PUMPS SHOWN ON THIS PAGE ARE FIGURED OUT ALL READY TO INSTALL IN YOUR WELL.

We cut, thread and fit the pipe, cylinder and rod to the proper length, so that the outfit can be screwed together and lowered into your well without any trouble. Simply order pump according to depth of well. It will go to you complete with all necessary parts, including: Pump, Cylinder, Pipe and rods; and all you have to do is simply screw the parts together with a Stillson or pipe wrench (which we supply at \$1.25). We furnish free the lag screws for screwing the base of pumps to platform.

## THESE PUMPS ARE SUITABLE FOR BOTH HAND AND POWER USE

No. 6C26—This represents our "Jumbo" Anti-freezing Lift Pump, for windmill, hand or power use. It is a regular closed-top pump, adapted to open or drive well; has six-inch stroke for hand and ten-inch stroke for power. It is a very substantial pump, and will work in wells to 100 feet in depth. Cap and lever are revolving, allowing handle to be placed in any desired position.

## You Save Big Money

in buying Pumps from us. We make a specialty of these goods and know exactly what you require. We are so confident that you can install any of these pumps that we guarantee to accept back any of these outfits and refund the price and any freight charges you paid, if you find that you cannot put it in so that it will work easily.

PRICES QUOTED ON "PREMIER" PUMP ARE WITH ALL GALVANIZED PIPE and rods to suit (no black pipe used at all), including 12-inch, two-leather, brass-lined cylinders and hose attachment, and all you need to do in ordering is to order exact depth of your well, and tell us how many feet of water in well. Cylinder will always be placed at bottom of well to suit. Prices include all necessary fittings, and instructions telling you how to instal.

## "PREMIER"

### Anti-Freezing Force Pump for Hand or Power

THE BEST STOCK FARM PUMP MADE, and is the pump we recommend for those who want a quality article at the right price. Requires only one-half the power of the common lift pump, due to our patented ratchet head. Will always work in the coldest weather.

With Brass Stuffing Box and 1 1-16 Piston Rod Complete, ready to put in.

**\$13.50**

With Cock Spout, 75c extra.

No. 6C27—"Premier" Stock Force Pump, with ratchet head, long weighted handle, suitable for deep or shallow wells, and for windmill, engine and hand use; specially designed to meet the demand for a high grade force pump. Back outlet tapped for 1 1/4-inch pipe, enables changing of water from spout to an elevated tank or to other parts where desired. An excellent pump for fire purposes, as well as supplying water to storage or other tanks. When used as a hand pump will work 50 per cent. easier than the ordinary hand pump; and as it is our largest-seller we advise you using this pump whenever possible. It has quick change lock bolt, that allows disconnecting and changing from power to hand in a moment.

WITH PLAIN SPOUT and HOSE ATTACHMENT

All Galvanized Pipe and Rods used.

Note the large size Piston Rod we use on our Force Pumps—1 1-16 with Brass Stuffing Boxes

### SAVED MONEY

Box 124, Birle, Man.,

Messrs. C. S. Judson, Ltd.

Dear Sirs—I have had the heavy "Premier" force pump working daily since I got it from you, and am raising water 130 feet with it by hand, and am very much pleased with its strength and easy working.

Yours truly,

W. W. CLEGHORN.

If you find that it is not, or if it does not satisfy in every way, return it to us and we will refund the full purchase price and freight charges both ways. This guarantee covers the harness indefinitely. If you find at any time that a strap, trace or any part gives out through fault of material or workmanship we will replace the defective part, our only provision being that the old part is sent in to us for inspection.

or ring style traces, complete, less collars **\$31.00**

If bridles not required, deduct \$3.75. If lines not required, deduct \$3.75.

## "BRUTUS" HEAVY SINGLE HARNESS. DOUBLE NECK AND HIP STRAPS

**\$23.50 per Set 30 Days  
Trial**

This harness is made for long hard service. Note the extra size of the strap-work and it is all of extra quality. This is without question the heaviest single harness on the Canadian market to-day. The finish is imitation rubber and the set has a handsome appearance.

**FINISH**—Smooth round edge finish; no creasing.

**BRIDLE**— $\frac{3}{4}$ -inch, box loop cheeks, square patent leather blinds, round winker braces, overcheck with nose band.

**LINES**— $1\frac{1}{2}$ -inch throughout, with spring billets;  $13\frac{1}{2}$  feet long.

**BREAST COLLAR**—Extra wide,  $3\frac{3}{4}$ -inch V shape, heavy leather; double neck strap with line rings.

**TRACES**— $1\frac{1}{2}$ -inch single strap, heavy harness leather; scalloped points stitched to breast collar; lined and stitched at back, with three holes.

**BREECHING**—2-inch single strap, heavy harness leather; scalloped layer at each end; box loop lead-ups;  $\frac{3}{4}$ -inch split hip straps, 1-inch side strap; scalloped and stitched turnback with round crupper sewed on.

**GIG SADDLE**—Harness leather skirts, enameled leather pad, beaded housing, patent leather jockey, double and stitched shaft bearers, Griffith style shaft tugs and belly-band.

Weight of harness, boxed for shipment, about 19 lbs.

No. 4B36—Price of Harness, with imitation rubber or nickel trimmings **\$23.50**

# Collars, Sweatpads, Strapwork and Harness Parts

### "MATCHLESS" SMOOTH SURFACE

Every ingredient, that enters into the manufacture of Matchless Roofing, is the best we can produce. Strong, tough roofing felt and tested grade of asphalt only are used. Then, not being satisfied with using the most dependable grades of materials, we analyze every ingredient thoroughly before we use it, so that we feel satisfied that everything going into the makeup of this roofing is positively weather resisting and durable. These precautions result in Matchless Roofing being a most reliable and durable, smooth surfaced roofing.

Each roll is packed complete with large head galvanized roofing nails, and the necessary liquid cement for cementing the laps, and full directions how to apply. Roll contains 108 square feet. Width of roofing, 2 inches.

Catalog No.	Thickness	Weight Pounds	Guaranteed to Wear	Price Per Roll
9C21—	1-Ply	40	7 Years	\$1.65
9C22—	2-Ply	50	10 Years	2.10
9C23—	3-Ply	60	12 Years	2.50

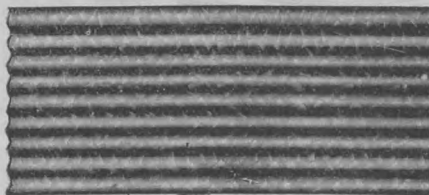

### "FLINT SURFACE"

HEAVIER THAN ANY OTHER FLINT SURFACED ASPHALT ROOFING

Our Flint Surface Asphalt Roofing is heavily surfaced with clean flint sand, adding much to its fire resisting qualities. Being sanded on the top side makes it especially fire-resisting, because flying embers or coals are not likely to set it on fire. Flint Surfaced Asphalt Roofing is 32 inches wide, and is put up in rolls containing 108 square feet, covering surface 100 square feet, 8 feet being allowed for 2-inch laps. It is guaranteed to be made from a long fiber roofing felt, saturated with the highest grade asphalt and double coated with highest grade pure mineral asphalt. It is absolutely free from animal oil and tar, and is guaranteed not to melt or run in summer, or crack or break in winter. A fire resisting roofing, suitable for any roof with a pitch of 1 1/2 in. or more per running foot.—Please compare the thickness, weight, strength and quality of materials used in our Flint Surfaced Asphalt Roofing with other makes of flint coated roofing and the result will be that you will order from us. Complete, with large headed galvanized nails, cement and directions for applying.

Catalog No.	Thickness	Weight Pounds	Guaranteed to Wear	Price Per Roll
9C30—	1-Ply	42	7 Years	\$1.50
9C31—	2-Ply	52	9 Years	1.85
9C32—	3-Ply	65	12 Years	2.25

## STEEL ROOFING AND SIDING

If you are not sure how much steel you require, send us a rough sketch of your building, include sufficient money and we will return balance.

WE FURNISH CORRUGATIONS 2 1/2-inch and 5/8-inch deep. —TWO WIDTHS.

When ordering specify lengths of sheets wanted; also allow for side and end laps. Corrugated sheets are furnished in sheets which actually measure 27 1/2 inches wide, but have a covering width of only 24 inches on account of the side lap, with exception of 33-inch sheets, which have a covering width of 30 inches. When ordering, allow from 4 to 6 inches for end laps, depending upon the pitch or slant of the roof. If used for siding, a 3-inch end lap is sufficient.

Catalog No.	Per 4-Ft. Sheet	Per 5-Ft. Sheet	Per 6-Ft. Sheet	Per 8-Ft. Sheet	Per 10-Ft. Sheet

Price each (imperial measure) ..... \$1.40 \$6.65 \$12.65

# JUDSON SANITARY CREAM SEPARATORS

## Take Every Drop of Cream from the Milk

THE JUDSON CREAM SEPARATOR is the Separator you want to get the greatest results from your dairy in the easiest way. Without a single salesman or solicitor in the last twelve years there have been over 400,000 of these Separators placed in the hands of ordinary users in competition with all the big selling machines operated by trained agents. That proves that this Separator must be right. We want to put a JUDSON in the hands of every cow owner in Canada for a trial at our risk. **IN YOUR OWN INTEREST READ THIS:—**

**JUDSON SEPARATORS** in all these years have proven their superiority in every dairy community, under all conditions, and against any competition, and still do so. The wonderful skimming qualities of the first JUDSON machines amazed and staggered other manufacturers, and that superiority has been retained to this day. In every detail of frame, gearing, bowl and tinware we have perfected our machine to such an extent that a disinterested mechanic cannot point to a single feature of any other separator and honestly say that it is better than any feature of the Judson machine.

**GUARANTEE**—We issue a strong, written and signed guarantee to each buyer, by which he is insured against loss through any defect in material or workmanship.

**REPAIRS**—An important feature about this machine is that the repairs are supplied to you when you require them at nominal prices, and always supplied promptly.

**PRICE**—Our Separators cost just as much to build as other first class machines, and we do not sell them at a loss, but by avoiding all the expenses and profit of branch stores, salesmen and agents we can make a big saving for every buyer, as a comparison of our prices with others will prove.

**OUR POLICY**—We aim to have the best Separator, regardless of cost, and to supply our customers at prices which are the lowest safe margin over the actual shop cost. We take a personal interest in every machine and every buyer; are always glad to supply any needed information or advice, and are prepared to do repair and overhauling, if ever necessary, promptly and in a workmanlike manner, at the lowest possible prices. If you require fuller information regarding this machine we will be glad to send you

### SPECIAL CREAM SEPARATOR CATALOG ON REQUEST

No matter what Separator you may favor or may be induced to try, we ask you to test the JUDSON alongside of it. If this Separator does not clearly prove that it is the better in every way, and thereby win a place in your dairy, you can do us no greater favor than to return it and let us send your money back. **WE GUARANTEE THE JUDSON TO BE NOT ONLY THE BEST AT THE PRICE BUT THE BEST AT ANY PRICE.**

### Ideal Ball-Bearing Hand Churn

This illustrates our Ideal Ball Bearing Hand Churn, one of the best and easiest running hand churns manufactured. Can be operated from a standing or sitting position.

The Ideal Churn has no superior, and is equal to the best churn made. Barrel is made of the best seasoned oak, varnished natural color, hoops painted bronze.

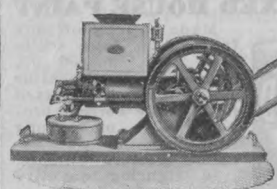

The axles are fastened to the barrel with bolts instead of screws, and run in ball bearing cages in main frame.

The side pedal drive works very easily, and as axles run on ball bearings, it requires but very little effort to work this churn.

No. 11B21—Capacity 10 gals., weight 60 lbs. Price .....	\$7.00
No. 11B22—Capacity 15 gals., weight 65 lbs. Price .....	\$7.50
No. 11B23—Capacity 20 gals., weight 70 lbs. Price .....	\$8.00
No. 11B24—Capacity 25 gals., weight 75 lbs. Price .....	\$9.50

### JUDSON PATENT POWER CHURN

Showing Churn running from slow speed pulley, found only on the Judson "Handy Boy" Engine.

THE BEST POWER CHURN MADE

New and improved Patent Churn. We equip all our Churns with patent pulley in place of the common pulley as used by others. A simple turn of the wrist on the friction lock starts the churn or stops it.

It does the churning far quicker and better than if done by hand. Cover fits tight and will not leak. Fasteners are attached to the outside of the churn and clamp the cover with a compound lever action. Cover has sight glass to show when churning is finished.

This churn can be run from a line shaft, or can be run direct from the engine.

Our prices save you money.

Thousands of These Machines in Daily Use.

## "BERKLEY" SEWING MACHINES

TRY ONE IN YOUR HOME FOR THREE MONTHS BEFORE YOU DECIDE TO KEEP IT

The Berkley is the very best sewing machine you can buy. Dealers and agents have been charging \$50.00 to \$65.00 and have sold millions of sewing machines identical in construction with the Berkley. The Berkley Sewing Machine part for part is an exact duplicate of a world-wide sewing machine which for years has been sold only through dealers and agents for \$50.00 to \$65.00. A good sewing machine with ordinary care and for the regular family sewing should last a lifetime. Our Berkley Sewing Machine is manufactured and constructed for this purpose. — Our Instruction Booklet makes all kinds of sewing easy, and means that you have a thorough instructor with you at all times. It also tells how to properly oil and take care of the machine in every way. — The high grade, highly finished quarter sawed oak woodwork of the Berkley shown on this page makes it one of the handsomest sewing machines ever manufactured. The drawers are all enclosed in handsome paneled drawer cases, which are made of specially selected large flaky figured quartered oak. Only the best grade of varnish is used in the finish of this woodwork, which is hand rubbed and highly polished in golden oak color.

Our Price Includes all accessories and an extra set of high-grade Greist attachments.

TRIAL**

Note the solid, heavy  
base of our Engines,  
which contains the fuel  
(reservoir) in base, in  
contrast to the wooden  
base and tin tanks  
used by others.

The above is an actual illustration of the Judson Horizontal Hopper Cooled Throttle Governed Engine for Kerosene or Gasoline. The Throttle Governing Kerosene Engine is not an attachment to replace a gasoline mixer on a hit-and-miss engine and use kerosene, but consists of a different governor, mixer, heating chamber, with automatic fuel control, which must be built into the Engine. The engine explodes a charge every working stroke. The governor graduating the amount of fuel and air taken into the cylinder in proportion to the load being pulled. To burn kerosene successfully the engine must be kept at an even temperature, and to form a gas from kerosene requires wholly different methods than when using gasoline. The speed regulation is very close, making it an ideal engine for power purposes, where a uniform speed is required.
